PROFESSIONAL SUMMARY

Senior Backend Engineer with 3+ years of experience in developing Microservices Architecture and high-performance APIs. Proficient in Node.js, TypeScript, and AWS cloud solutions with a track record of improving application performance by 40%. Implemented efficient caching strategies and database optimizations to support 2.5M+ daily active users. Specialized in scalable architectures that maintain 99.95% uptime during peak traffic periods.

EDUCATION

Guru Teg Bahadur Institute Of Technology

New Delhi, India

Bachelor of Engineering in Electronics and Communication; CGPA: 8.6/10.0

August 2018 – July 2022

- Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Computer Networks, Web Development

Hans Raj Model School

New Delhi, India

CBSE, Class 12: 75% (Science with Computer Science) — Class 10: 94%

March 2016 – March 2018

PROFESSIONAL EXPERIENCE

Backend Software Engineer

January 2025 – Present

Care Health Insurance

Gurgaon, Haryana

- Modernized Discount Connect module from PHP to TypeScript, reducing load time by 35% and serving 17,500+ daily requests.
- Engineered Redis caching strategies, slashing API response times by 40% across a service supporting 1.2M+ monthly active users.
- Restructured SQL database through advanced indexing, cutting query execution time by 30% and decreasing server load by 25%.
- Integrated Box Service for centralized authentication, elevating security compliance by 40% and eliminating credential-related incidents.

Software Development Engineer

July 2022 – January 2025

Noise

Gurgaon, Haryana

- Developed RESTful APIs with Node.js and TypeScript, enhancing communication efficiency by 30% within an ecosystem processing 57M+ API calls weekly.
- Deployed high-performance data systems managing 2.3TB monthly data using Redis, MySQL, and AWS services with 99.95% uptime.
- Optimized backend infrastructure with load balancing to accommodate peak traffic of 125,000 concurrent users during special events.
- Spearheaded social engagement features including challenges and rewards systems, increasing user retention by 40% and daily sessions by 22%.

Full Stack Developer Intern

March 2022 – July 2022

BITCS

Noida, Uttar Pradesh

- Built RESTful APIs using Node.js and Express.js, delivering 28% faster data exchange between frontend and backend components.
- Created responsive single-page applications with React.js and Node.js, accelerating page load speed by 25% and decreasing bounce rate by 18%.
- Designed and implemented a MongoDB-based system for data management, achieving a significant reduction in data redundancy by 25%, optimizing storage costs, and improving overall application performance and reliability.

KEY PROJECTS

Customer Mobile Backend Platform | *Node.js, TypeScript, Redis, MySQL, AWS*

January 2025 – Present

- Orchestrated microservices architecture for mobile app supporting 85,000+ daily active users with 99.9% availability.
- Spearheaded Discount Connect module enabling users to access 500+ partner medical centers, processing 3,200+ transactions daily.
- Integrated AWS Secret Manager for credential security, reducing unauthorized access attempts by 95% and fulfilling all compliance requirements.

NoiseFit Application Platform | *Node.js, Express.js, MySQL, Redis, AWS, Microservices* July 2022 – December 2024

- Pioneered backend development for health application with hybrid architecture powering 2.3M+ daily active users across 12 countries.
- Formulated watchface management API handling 15TB of user data monthly, boosting app retention rates by 40%.
- Implemented features for step streaks, rewards, and social engagement that increased user interaction by 35%.
- Executed real-time features including live score broadcasting, accommodating 230,000+ concurrent users with 99.98% uptime.

B2B Enterprise Health Platform | *Node.js, MySQL, AWS, Redis, Microservices* July 2022 – December 2024

- Established secure API system processing 350M+ daily health data points including steps, calories, heart rate for 42 corporate clients.
- Developed comprehensive analytics dashboard tracking 15+ health metrics in real-time, slashing report generation time by 98%.
- Launched engagement features with live leaderboards across mobile and web platforms, elevating employee participation by 35%.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, HTML5, CSS3, SQL, JSON

Frameworks & Libraries: Node.js, Express.js, Sequelize ORM, Mongoose ODM, REST APIs

Databases: MySQL, MongoDB, Redis, PostgreSQL, DocumentDB, Elasticsearch

Cloud & DevOps: AWS (S3, EC2, Lambda, RDS, CloudFront, Secret Manager, CloudWatch), Docker

Developer Tools: Git, GitHub, VS Code, Postman, Jira, Redmine, Bitbucket, Linux, Bash, npm, Webpack

Architecture: Microservices, RESTful APIs, MVC, Event-Driven, GraphQL, Serverless

Methodologies: Agile, Scrum, Domain-Driven Design
